

Free-field EPWP spikes vs acceleration response (Reviewer C13)
Top: excess pore water pressure at 25 mm depth | Bottom: base acceleration + soil acceleration at 75 mm depth
Note: no free-field accelerometer at 25 mm — nearest sensor (AC31, z = 75 mm) used

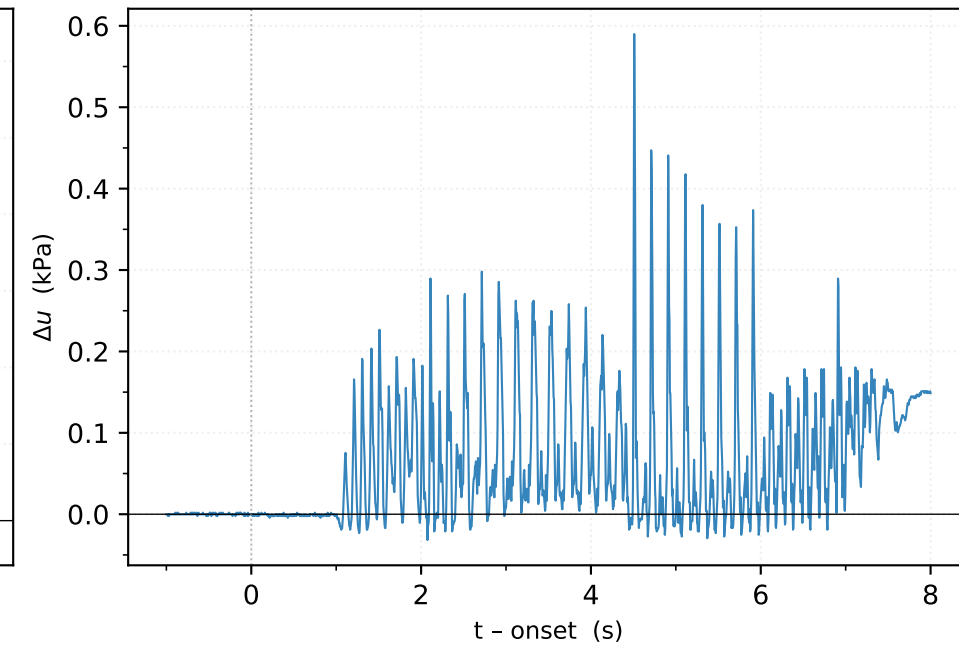

Case 3 (3D straight)
Free-field EPWP (PW = PW3)

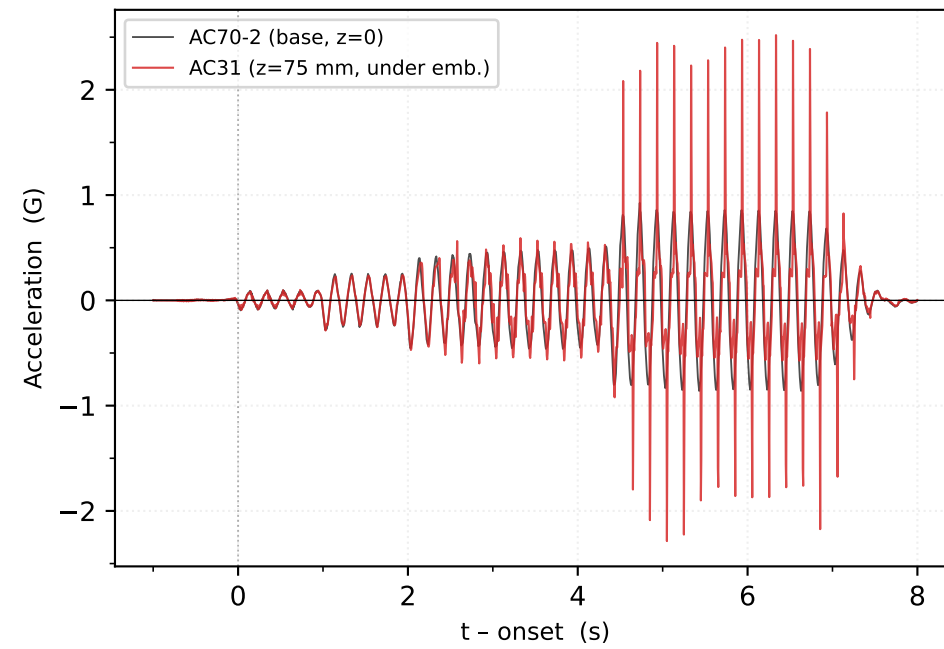

Case 4 (3D L-shaped)
Free-field EPWP (PW = PW3)

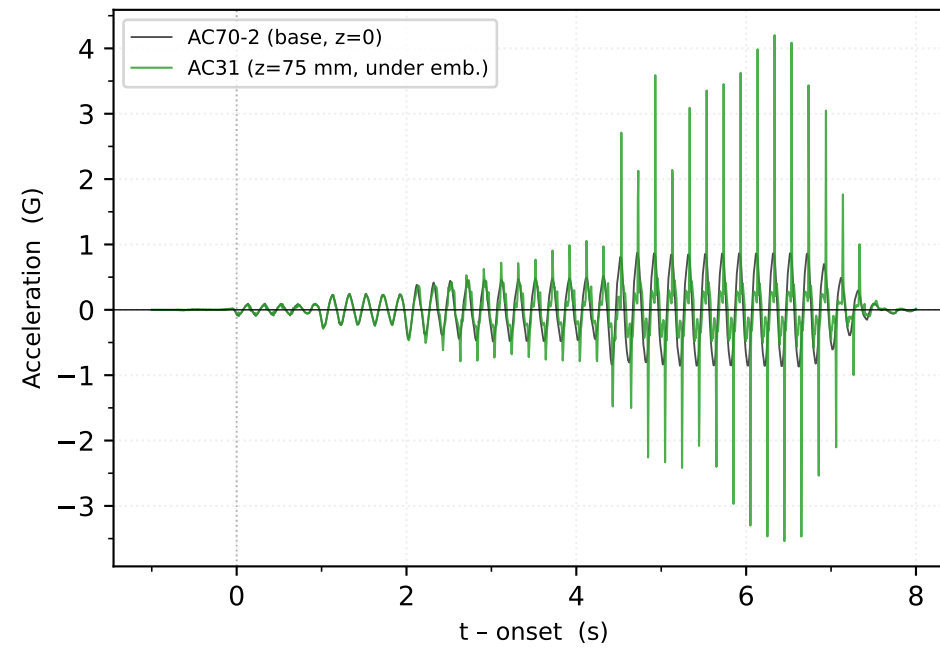

Case 7 (2D plane-strain)
Free-field EPWP (PW = PW8706)

Acceleration comparison
(base = black; soil at 75 mm = coloured)

Acceleration comparison
(base = black; soil at 75 mm = coloured)

Acceleration comparison
